Job Description:

We are seeking entry level and experienced Fire Protection engineers and designers. Responsibilities consist of design and documentation of Fire Protection systems including sprinkler (wet, dry, preaction, mist), standpipe, fire pump, and water supply systems. Code research, hydraulic calculations, field work, and client interface is required.

Degree in Fire Protection Engineering or Mechanical Engineering required.

PE, EIT, NICET certification preferred. Revit experience preferred.

Altieri offers excellent benefits including 401k, health insurance, flexible work week, summer hours, and a casual working environment. We offer work on challenging nationwide projects from our office located in scenic CT, only 50 miles from downtown Manhattan.
