FEDITC, LLC is a fast-growing business supporting DoD and other intelligence agencies worldwide. FEDITC develops mission critical national security systems throughout the world directly supporting the Warfighter, DoD Leadership, & the country. We are proud & honored to provide these services.

OVERVIEW OF POSITION:
FEDITC is looking for a Registered Fire Protection Engineer to support our Air Force customer’s civil engineering mission and internal operations near Tokyo, Japan. The candidate will provide engineering planning, programming, and project management support for support of Military Construction (MILCON) renovation of housing units, as well as other MILCON projects.

This position is located near Tokyo, Japan and does not require current residency in Japan. Personnel will be provided Status of Forces Agreement (SOFA) status, as well as a predetermined and fixed housing allowance.

REQUIREMENTS:
- Provide Advisory and Assistance Services (A&AS) to our Air Force client
- Ensure local standards, regulations, and, in particular, fire codes are met
- Provide briefings for base leadership on project status and other related issues
- Provide technical support in planning, budgeting, and data analysis of project design reviews
- Assist with project oversight of all MILCON and Sustainability, Restoration and Moderation (SRM) projects
- Assist in preparation and execution of acquisition packages and resolution of construction challenges
- Review project material submittals and deliverables, and provide technical comments
- Provide technical expertise to the Government at multiple meetings
- Provide cost analysis, estimates, and scheduling support
- Provide Quality Assurance and Quality Control (QA/QC) of other contractors’ work products
- Maintain applicable security clearance(s) at the level required by the client and/or applicable certification(s) as requested by FEDITC and/or required by FEDITC’S Client(s)/Customer(s)/Prime contractor(s)
- Other support duties as needed/directed

EXPERIENCE/SKILLS:
- Must have at least 5 years of fire protection experience providing fire protection at military facilities
- Knowledge of Federal regulations and statutes, as well as Air Force and Department of Defense regulations; knowledge of Japanese regulations and statutes is preferred

EDUCATION:
- Minimum of a Bachelor’s degree in Fire Science, Mechanical Engineering, or related field

REGISTRATION:
- Professional registration as a Fire Engineer / Fire Protection Engineer is required (any state)
- While not required, experience as Authority Having Jurisdiction at the MAJCOM level is desired

CLEARANCE and OTHER REQUIREMENTS:
Registered Fire Protection Engineer

- US Citizenship required
- Must have current eligibility for a Department of Defense Common Access Card (CAC) and/or National Agency Check with Inquires (NACI), as determined by FEDITC’s Facility Security Officer and/or Government client
- Must have a current US passport

TO APPLY:

- To apply for this position, please visit our “Careers” page at www.feditc.com, or contact Matt Elliott at melliott@feditc.com.
