Senior Fire Protection Engineer

Job Description:

JENSEN HUGHES has a career opening for a Senior Fire Protection Engineer/Project Manager in our Fairfax, VA office. We are a leading fire protection consulting firm providing a range of professional services involving life safety, fire protection, security and mass notification on commercial, institutional and industrial projects for clients worldwide. Qualified candidates will have a minimum of eight (8) years of experience that includes a combination of Code Consulting, Performance Based Design, and Fire Protection System Design. Candidates should be a registered Professional Engineer with proven project management and fire protection engineering experience. Responsibilities will include the management and implementation of a wide variety of engineering design and consulting projects. As a member of our team you will:

- Plan and direct engineering activities for your own projects.
- Conduct building and fire code reviews and analyses.
- Design fire protection systems including fire alarm, sprinkler and special hazard systems.
- Prepare and present technical reports and presentations.
- Be a key player in Business Development activities.

Requirements:

- 8+ years of experience in code consulting, design of fire suppression and alarm systems, and developing performance-based strategies in a project design environment is required.
- Have excellent report writing and interpersonal skills.
- Should have the ability to present clear and technically sound fire protection engineering strategies and have good communication and negotiating skills.
- Can work independently and as part of a team, enjoy professional challenges and wants to be an integral part of the long-term growth of JENSEN HUGHES.
