The Fire Protection Research Foundation is the research affiliate for the National Fire Protection Association, a worldwide leader in fire, electrical, building, and life safety. The Research Foundation supports NFPA in its mission to protect the public from fire related injury, death, and property damage by providing NFPA with the scientifically based data and information it needs in support of its key program activities, most notably the NFPA fire safety codes and standards.

The Research Foundation is looking for two unique engineering students to work in a collaborative environment on a number of tasks involving fire safety research, as well as data synthesis and analysis. Interns will also have the opportunity to build and expand their portfolios through co-authorship on internal and external publications from the Fire Protection Research Foundation.

The first position would help to support the research initiatives for the foundation for the remainder of this year, and the second position would begin in January of 2017 and would extend through the remainder of the year (2017).

Requirements:

- Senior or graduate level in engineering (any discipline)
- Basic knowledge in written and oral communication skills

Please be sure to send your resume and cover letter to Katelyn Enman atKenman@nfpa.org
